

Log Cabins 2 Go... No Assembly Required!

A Log Cabin 2 Go is a 400 square foot full log park model cabin that can be brought to your site for immediate enjoyment! From the steel I-Beam main frame through the metal roof, you will discover that the quality of the materials far exceeds your expectations. Don't confuse this with a park model with log siding on the exterior. A GLH Log Cabin 2 Go has full logs exterior walls and built like a real log cabin!

Welcome to a new era in log cabin living!

Log Cabins 2 Go (LC2GO) are a totally new concept using full log wall construction in a park model housing unit. Your Oak log cabin is manufactured in the controlled environment of a factory and is completely finished and ready to enjoy when it arrives at your site. The log construction includes dovetailed corners and the logs are sealed on the exterior and varnished on the interior. This is the only full log Oak park model available in the world!

A Log Cabin 2 Go is perfect for a weekend cabin, especially in locations where it is difficult to site build or there are property restrictions. Hunting cabins, art studios, and guest cabins are favorites also. Rental units for lakes and other recreational areas are very popular for commercial applications. Where do you want a log cabin? Why not a Log Cabin 2 Go?

Four standard floor plans are available as a LC2GO or we can build a custom plan to your specifications! Each plan features up to 400 square feet of main level living space. Porches, lofts and other amenities can be added as per your wishes.. Doors and windows can be added or deleted as well. Custom features such as built in wardrobes, window seats and custom medicine cabinets are also available. Choose from our many options for the cabin that perfectly suits your needs.

Each unit has cathedral beamed ceilings with T&G wood car siding. All of the floors are finished with 3/4" solid Oak flooring. Each cabin has a green metal roof and is complete with a 100 amp electrical box and a 20-gallon electric water heater. The kitchen and bath are fully functional and include custom wood cabinets. Although titled as a recreational vehicle, a LC2GO feels like and is built like a true log cabin.

Come see a Weekend Memories model at our national model home center at Exit 144 on I-70 East of Columbia, MO. Explore the optional loft and enjoy the spacious 10'x12' porch. In as little as 8 weeks you could be enjoying your own Log Cabin 2 Go!

(Also ask to see the floor plan for the Camper Chalet with stairs to the loft!)

Bring the family or friends and make your own new memories in our Weekend Memories model. There's no better way to enjoy a lakeside outing!
